

How To DRAW A SNAKE

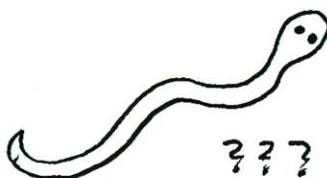

(by Linus Tuttle)

~~~~~(v v v v v)~~~~~(v v v v v)

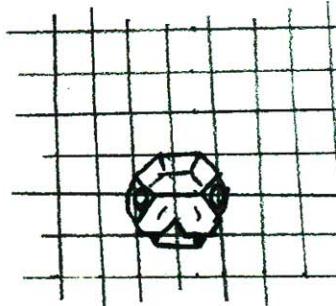

---

I. Practice the fangs first.  
They are the most important  
part. They tell people your  
drawing is of a snake and  
not a worm.

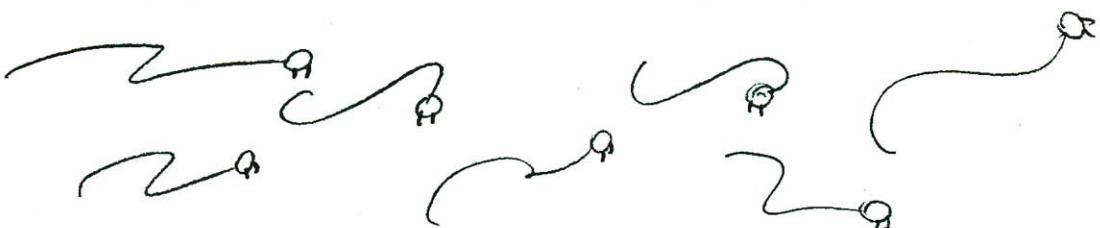

II. The scales are really hard.  
They are all different shapes.  
You can practice on graph paper  
or draw a grid with a ruler.

---

III Practice drawing squiggles. Just think  
about how a snake moves.

---

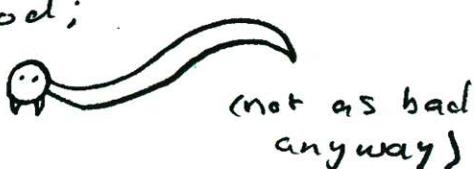

IV Make sharp, clear, lines. If you sketch  
too much the snake looks like a stuffed  
animal and is not scary.

---

Bad:

Good:

(not as bad  
anyway)
